

Welcoming Courageous Connection & Vitality

With Family & Human Systems Constellations

Francesca Mason Boring, All My Relations Constellations

Workshop April 26-27, 2025

Generational trauma, pain, migration, war, famine, poverty, plagues, natural disasters, and many other events in previous generations may impact our ability to succeed, embrace good health, have loving relationships and have hope.

In the safety of the Circle we remember the sweetness of life, the resilience of our lineage and the healthy aspects of the families and communities that we have come from. The strength of our ancestors, and our capacity are remembered and embodied in family & human systems constellations.

Francesca is a bi-cultural international facilitator, author and teacher who has contributed to the development of Nature Constellation, Community Constellations & Constellation as Ceremony.
